

ANDY HIRSCH

# POLLUTION BIRDS

PART 2

is for the

BIRDS

We're going to *save the world*?

**Yes!**  
You've opened my eyes to *pollution*, now keep your eyes open for *solutions!*

 **Think Earth**  
ENVIRONMENTAL EDUCATION  
FOUNDATION

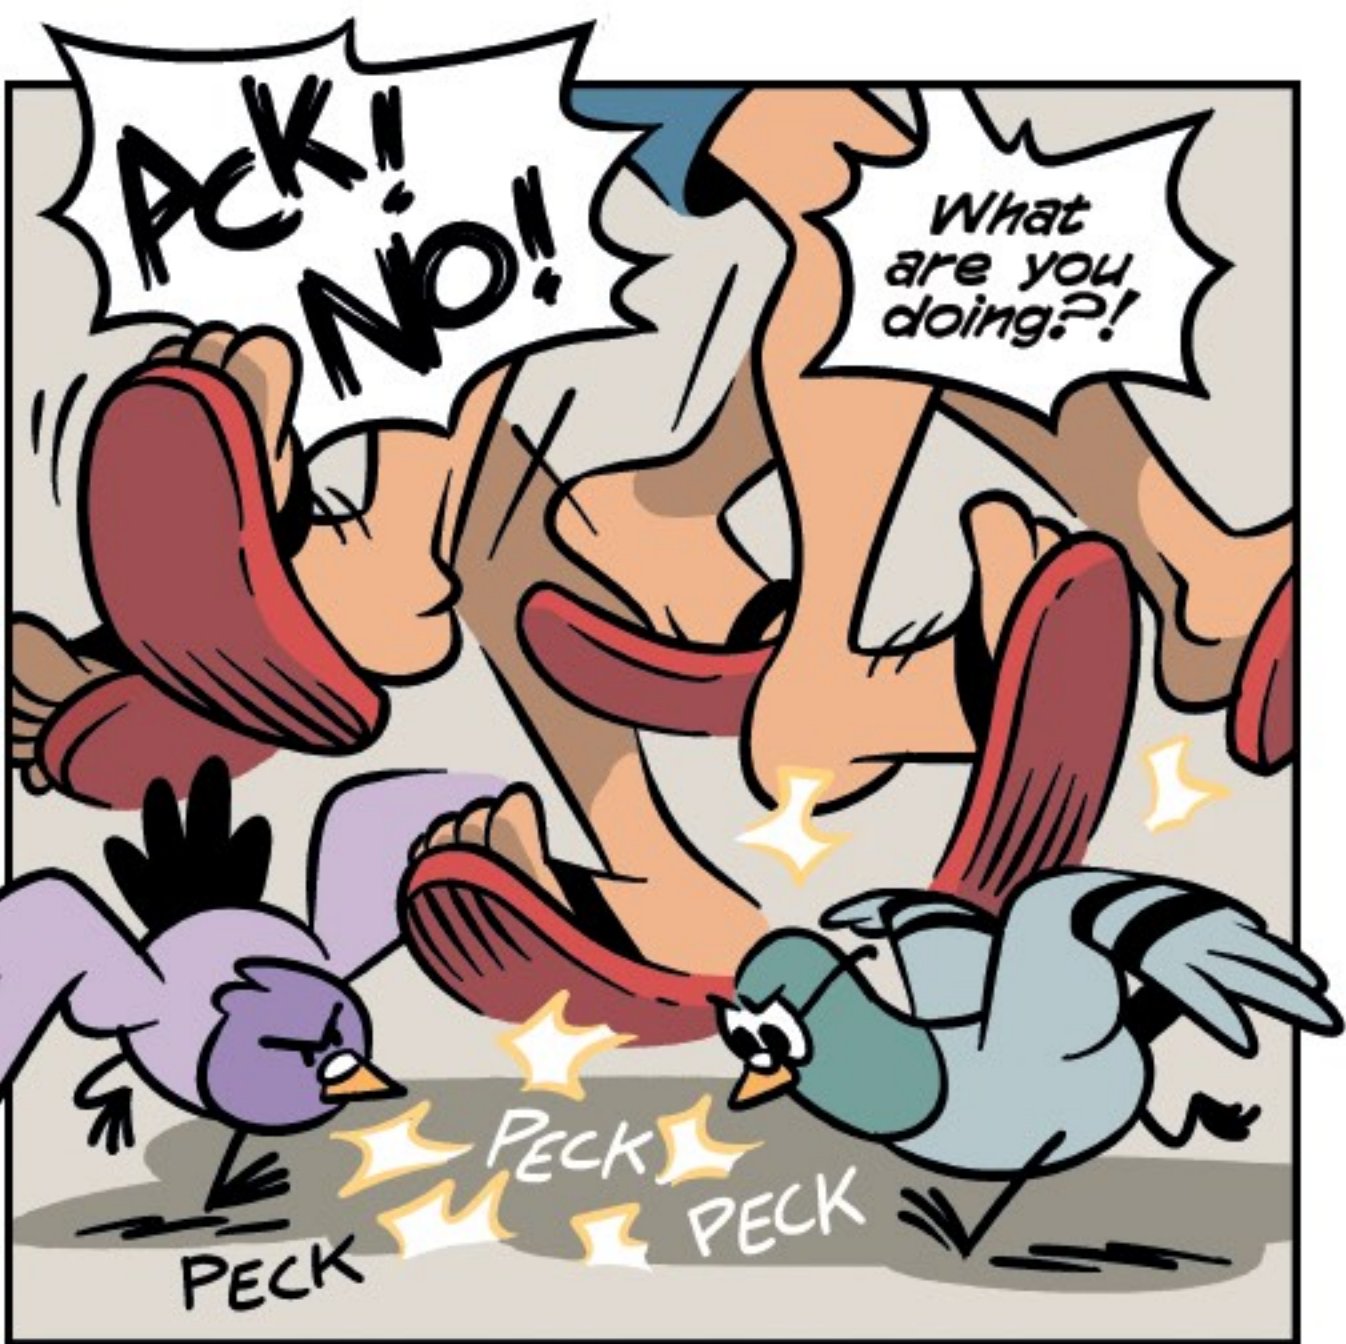

How're we going to get *billions* of people to pollute less?

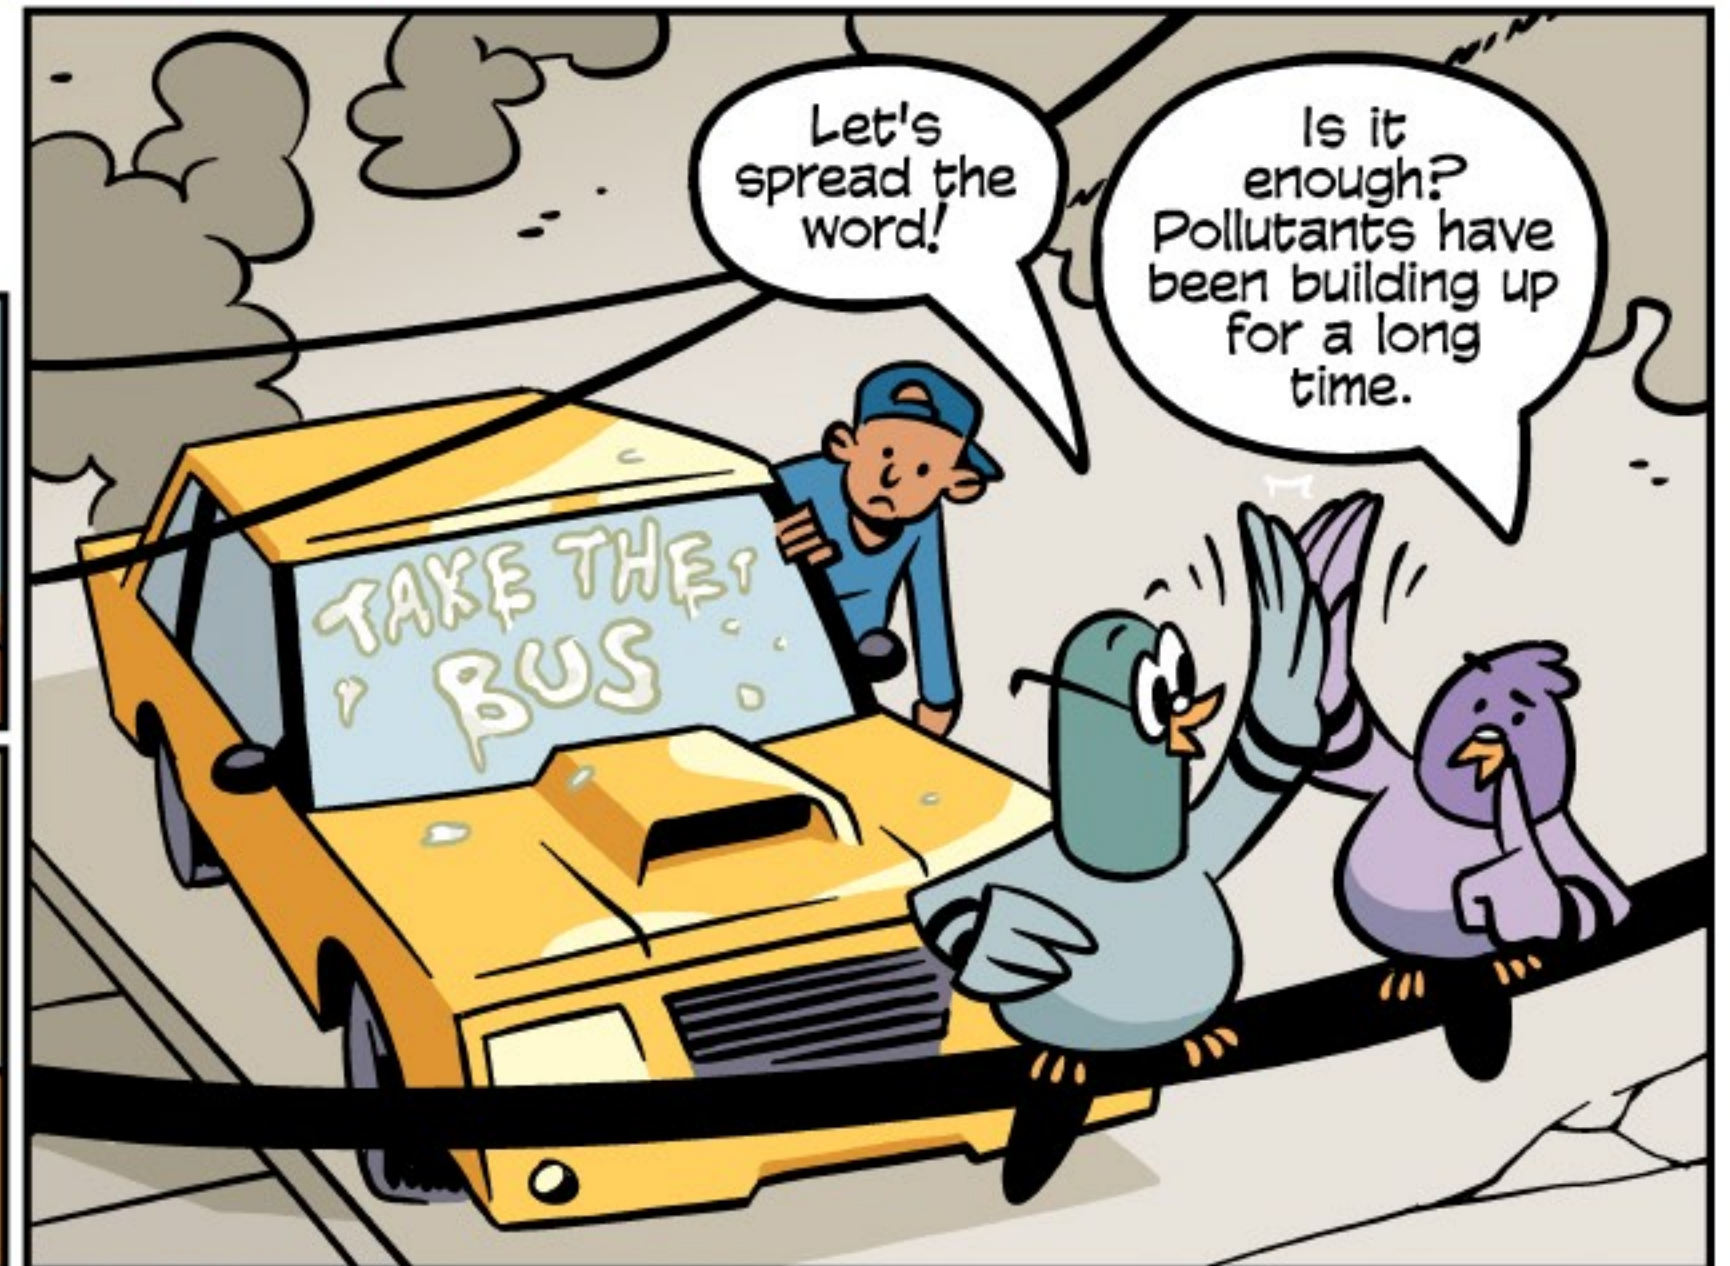

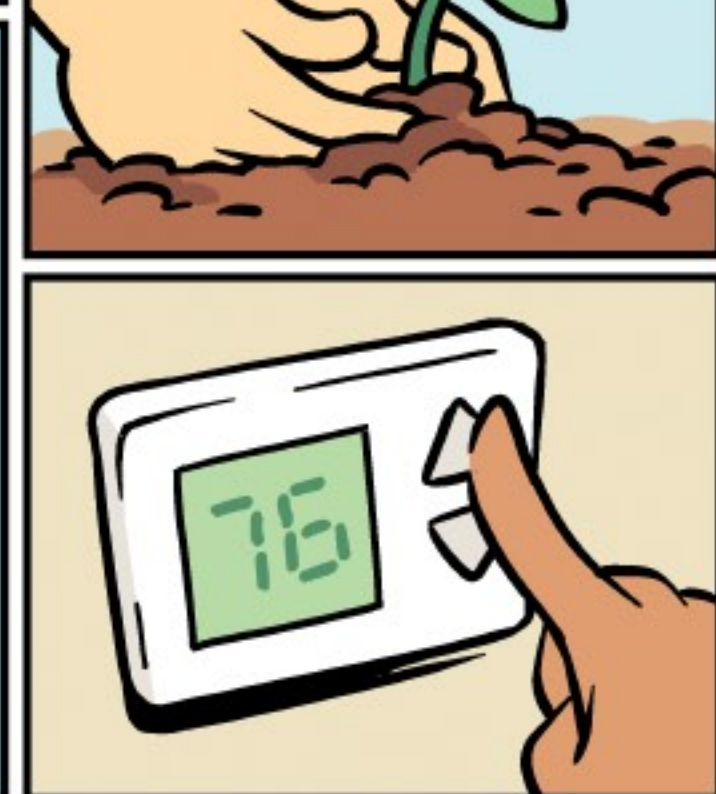

We'll start by not giving up!

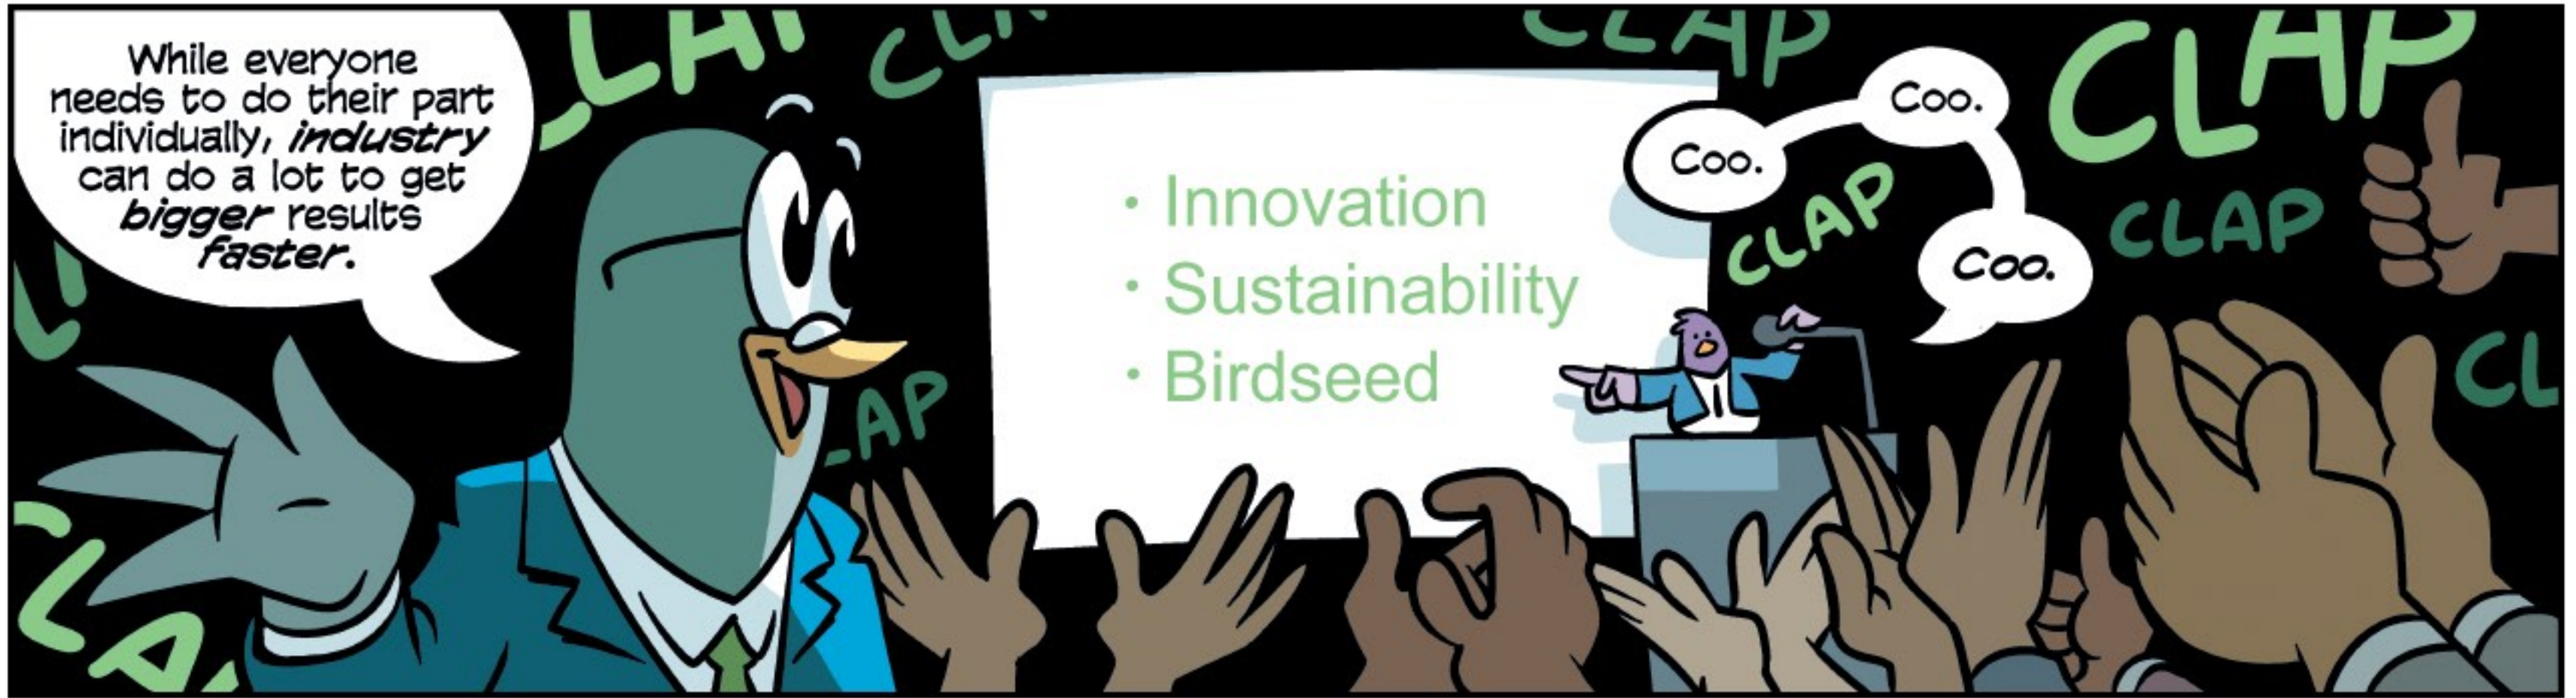

I'll do my best. Then what?

We'll go one human at a time.

**CLUNK**

While everyone needs to do their part individually, *industry* can do a lot to get *bigger* results *faster*.

- Innovation
- Sustainability
- Birdseed

Coo. Coo. Coo. Coo.

Companies have to *make* efficient products before people can use them.

ENERG EFFICIE

Coo.

And they can reduce pollution while they're at it.

Quack.

It is a nice day.

There are ways for *every* industry to transform for the better.

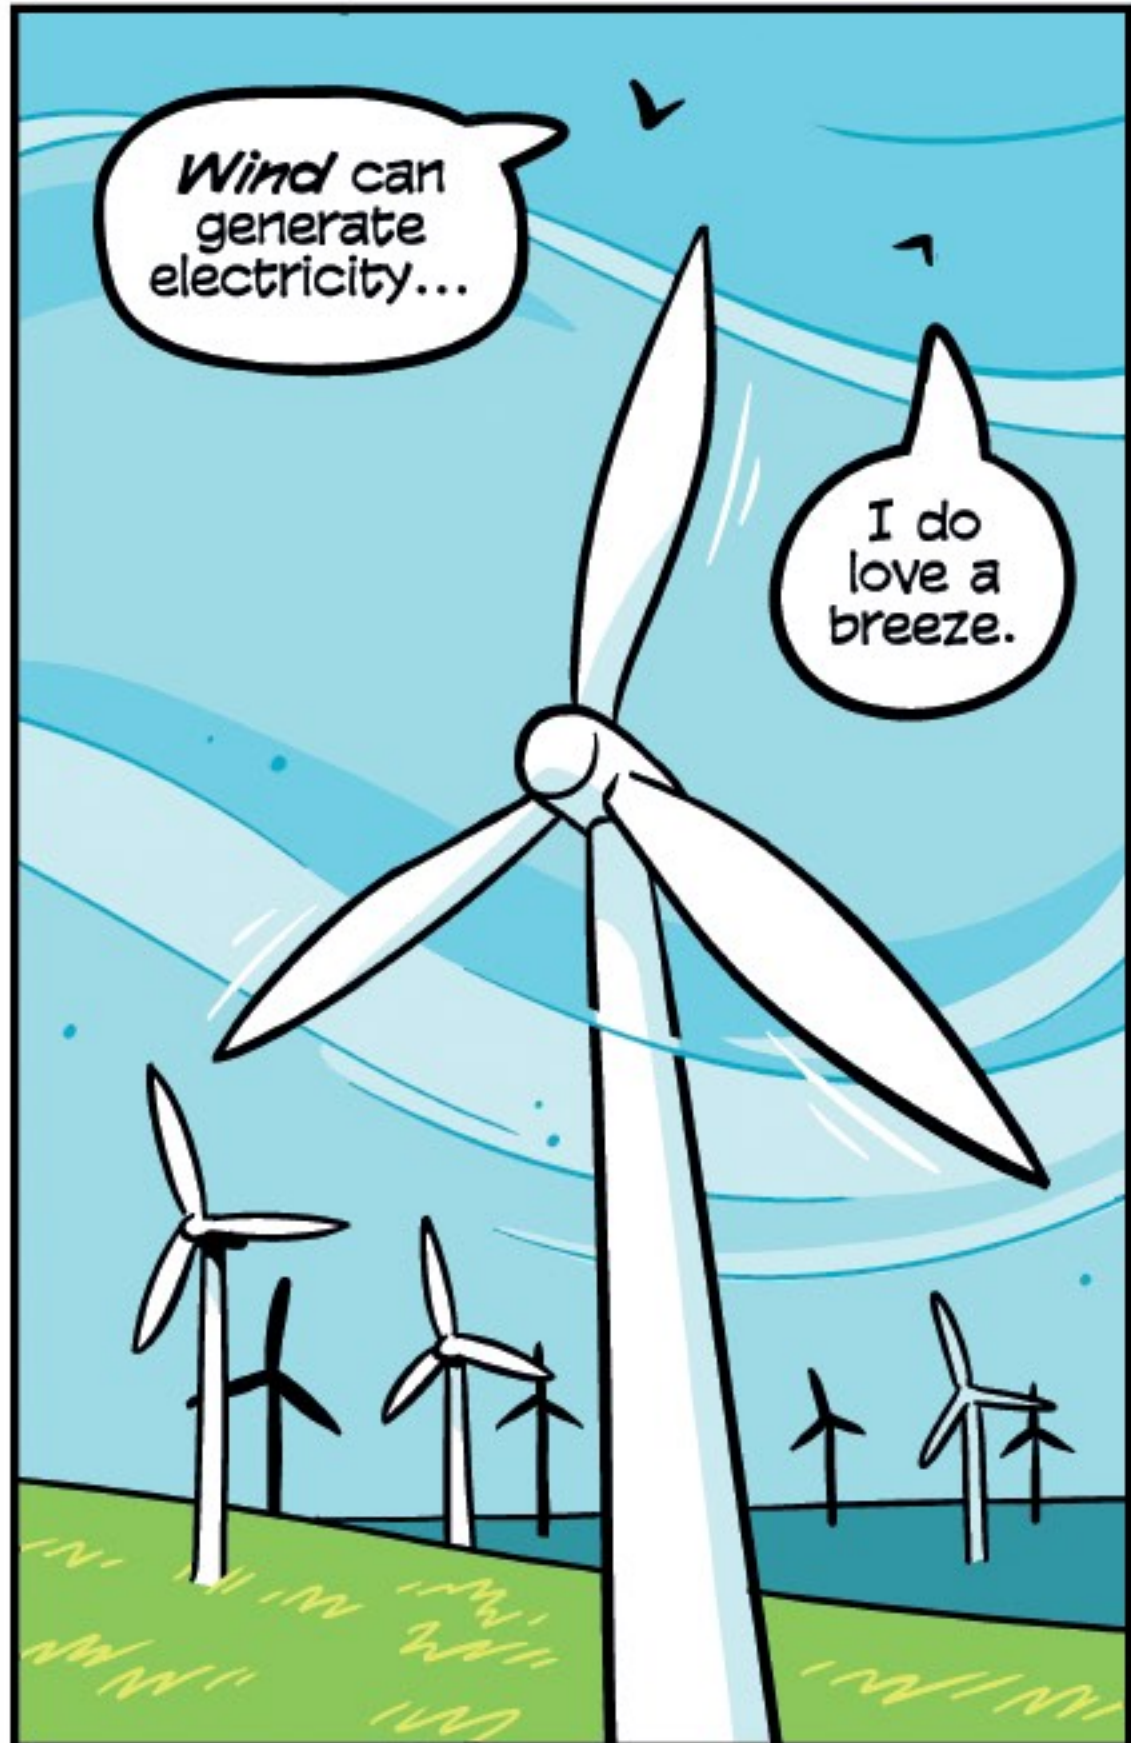

YORETOWNE ORGANIC FARM

Even the energy industry?

Yes! We've got to generate electricity, but we don't need to burn so many fossil fuels like oil, natural gas, and coal.

Are there cleaner options?

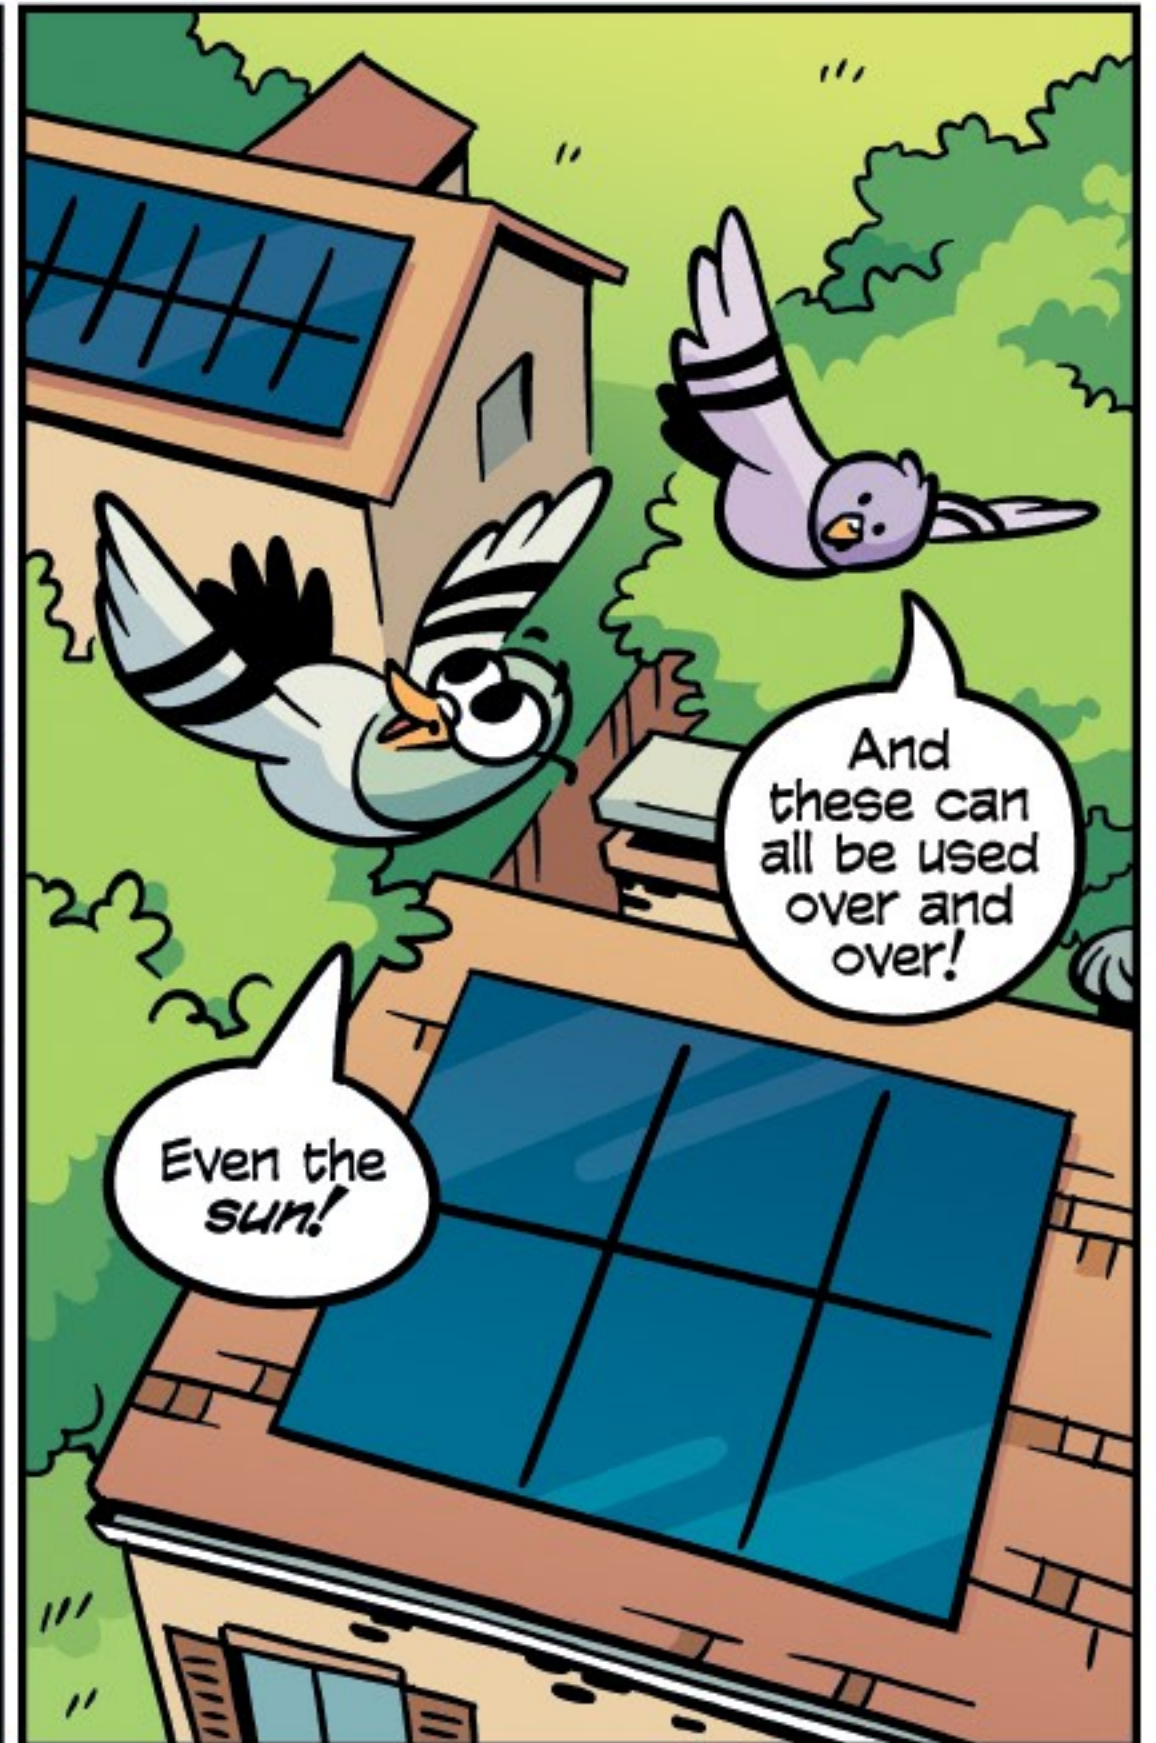

Wind can generate electricity...

I do love a breeze.

So can water...

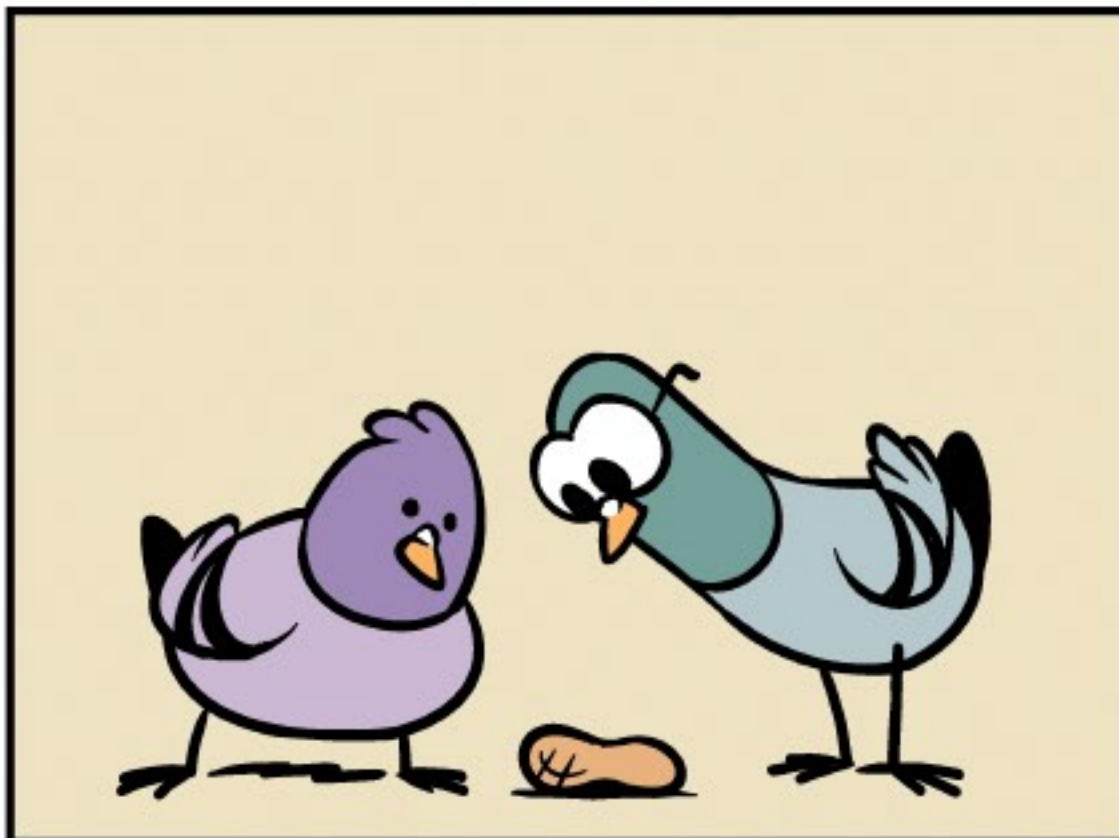

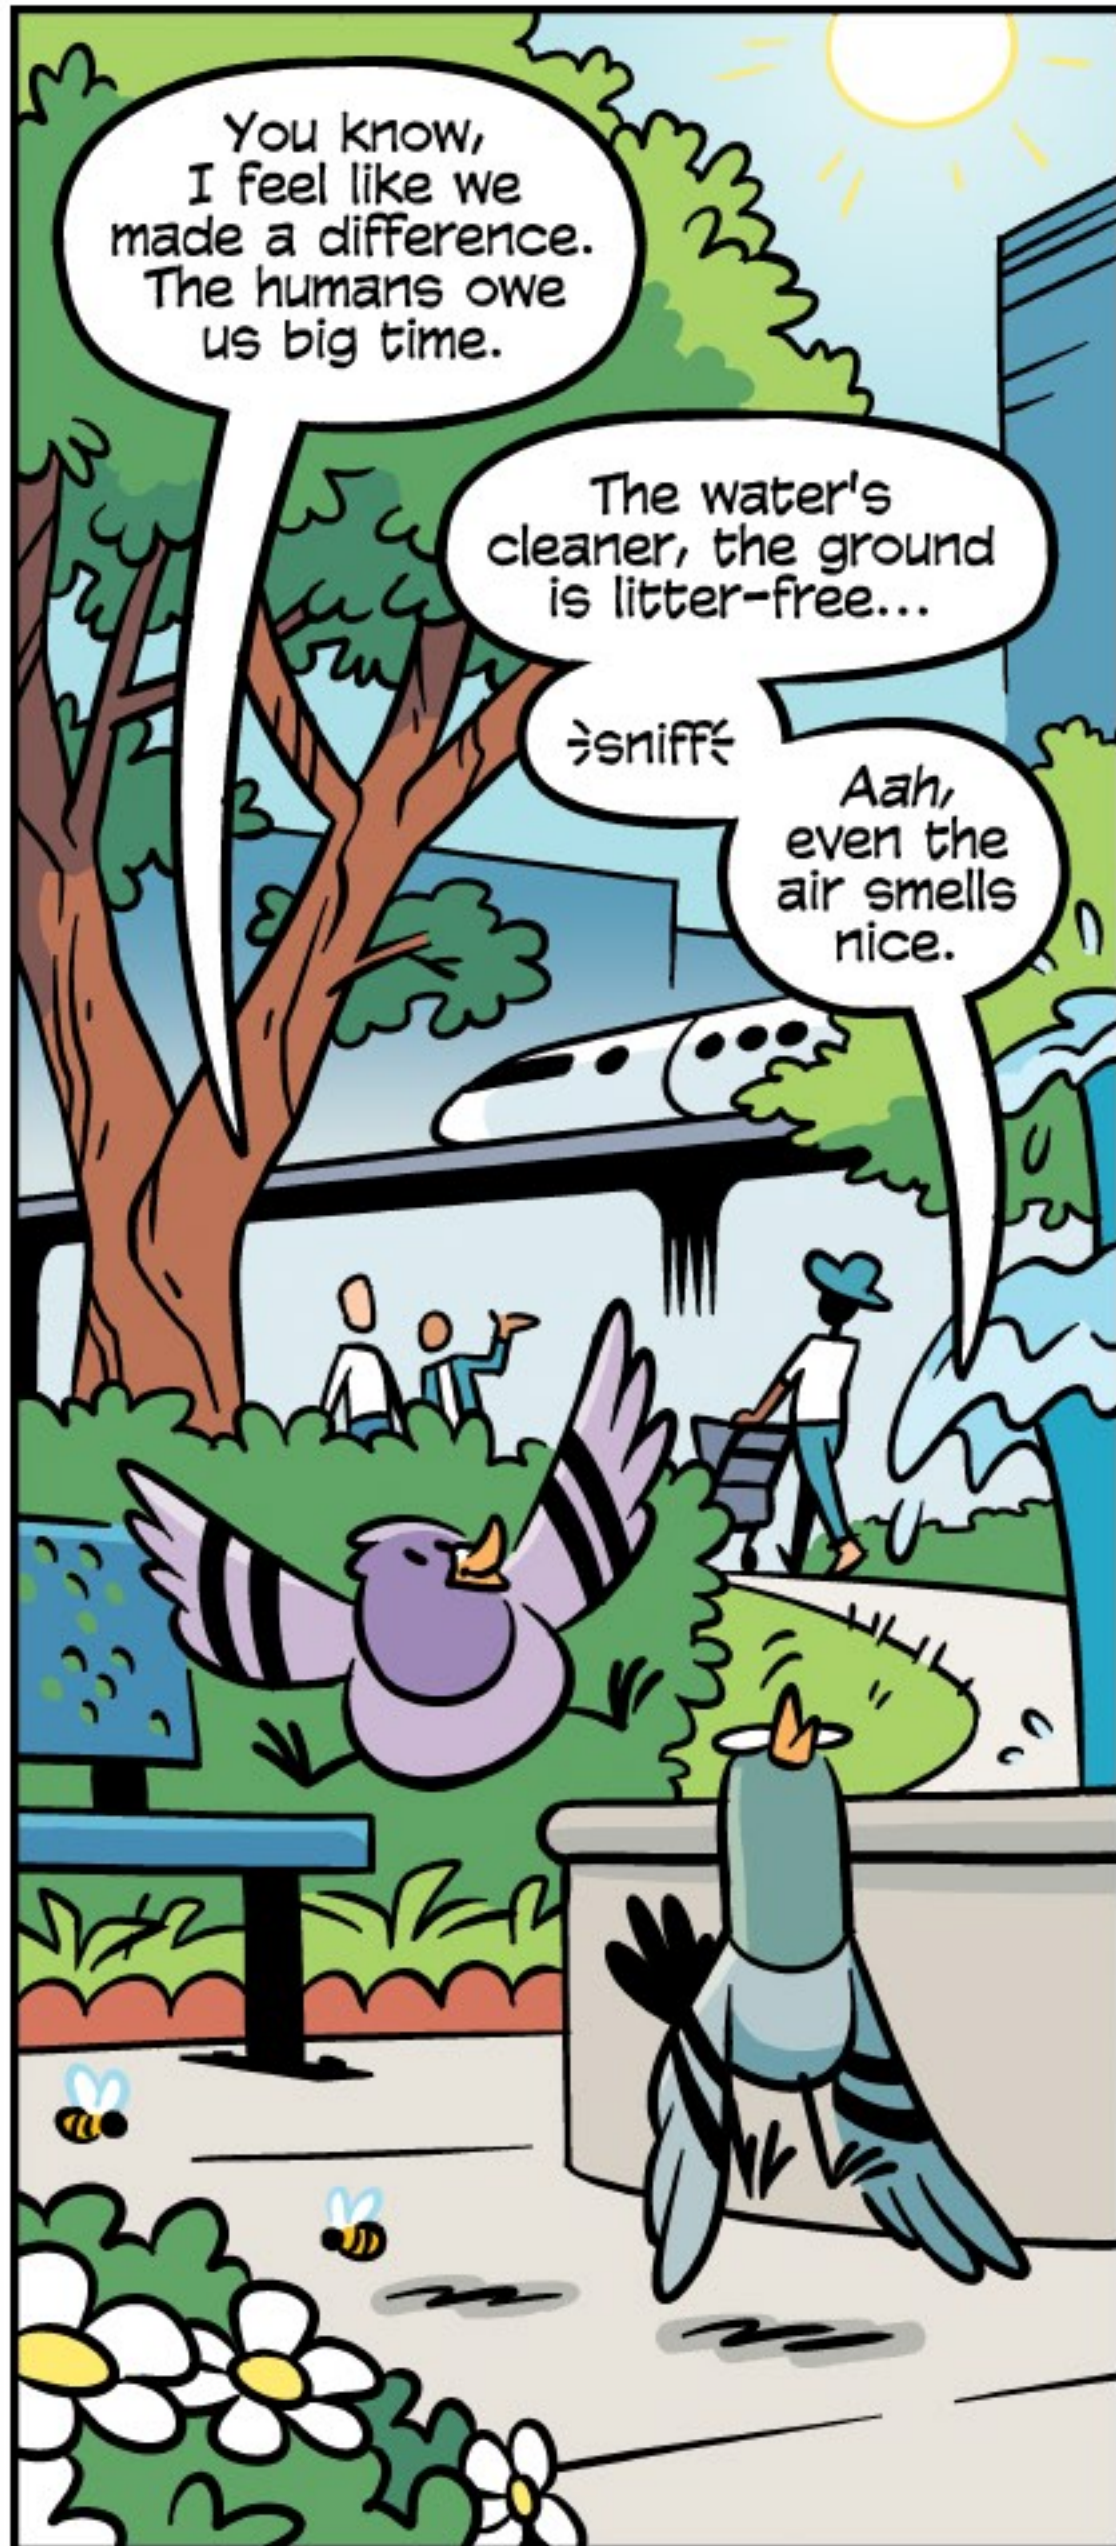

Mmm, baths aren't bad.

Even the sun!

And these can all be used over and over!

And so...
